EDUCATION

- Thapar Institute of Engineering & Technology, Patiala**
Bachelor of Engineering – Computer Science & Engineering; CGPA: 7.51 August 2023 - May 2027
Courses: Introduction to Computer Programming, Operating Systems, Computer Architecture, Data Structures and Algorithms, Object Oriented Programming, Computer Networks, Machine Learning, Software Engineering, Data Engineering, Database Management Systems, UI & UX Specialist, Test Automation, Calculus, Linear Algebra
- Central Board of Secondary Education**
Senior Secondary - 12th; Percentage: 88.6% April 2021 - March 2023
- Central Board of Secondary Education**
Secondary - 10th; Percentage: 91.4% April 2020 - March 2021

SKILLS SUMMARY

- Programming Languages:** Java, C++, JavaScript
- Backend Technologies:** Spring Framework (Spring Boot, Spring Data JPA, Spring Security, JWT Authentication), Hibernate, WebSocket API
- Frontend Technologies:** HTML5, CSS3, JavaScript, React.js, Bootstrap
- Databases:** MySQL, MongoDB
- Tools:** VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Maven, Postman

PROJECTS

- Thapar On Wheels**
Tech Stack: Spring Boot, React.js, MongoDB
 - Description: Developed a full-stack campus cab booking platform for students and drivers within Thapar University.
 - Link: [\[GitHub\]](#)
 - Role: Designed and developed the backend APIs, authentication system, database integration, exception handling, and contributed to the React frontend.
 - Technologies Used: Java, Spring Boot, Spring Security, JWT Authentication, MongoDB, React.js, REST APIs, Git/GitHub, Java Mail Sender.
 - Outcome: Implemented secure JWT-based login and role authorization, scalable backend architecture, DTO-based clean API design, error handling, and frontend-backend integration.
- FestTrack**
Tech Stack: Spring Boot, React.js, MongoDB
 - Description: Developed a full-stack event management and ticket booking platform that allows organizers to create and manage, Users to book tickets for events along with ticket generation and Verification.
 - Link: [\[GitHub\]](#)
 - Role: Designed and developed the complete backend architecture including JWT authentication, role-based access control, booking workflows, payment verification system, geospatial event discovery, email integration, and REST APIs. Also contributed to frontend integration.
 - Technologies Used: Java, Spring Boot, Spring Security, JWT Authentication, MongoDB, Geospatial Queries, GeoJSON, React.js, REST APIs, Java Mail Sender, Git/GitHub.
 - Outcome: Implemented secure authentication and protected APIs, built a real-world booking lifecycle with payment states and ticket verification, integrated MongoDB geospatial search using 2dsphere indexing, and strengthened understanding of scalable backend architecture, DTO-based API design, workflow validation, and frontend-backend integration.
- CommUnity**
Tech Stack: Spring Boot, WebSocket API, React.js, MongoDB
 - Description - Developed a full-stack community-based social platform where users can create communities. Create Posts within communities, comment and like on each other's post, and chat with each other.
 - Link - [\[GitHub\]](#)
 - Role: Designed and implemented RESTful backend APIs, authentication and authorization system, community membership validation, post/comment management, used WebSocket API for Real time chat updates, and integrated the frontend with secured APIs.
 - Technologies Used: Java, Spring Boot, Spring Security, JWT Authentication, MongoDB, REST APIs, Git/GitHub, Java Mail Sender, WebSocket API.
 - Outcome: Gained hands-on experience in full-stack development, secure authentication, frontend-backend integration, state management, API design, authorization handling, and scalable social platform architecture.

POSITION OF RESPONSIBILITY

- Head Boy, SAJSMS:** Elected as the senior student representative, responsible for organizing school-wide events, fostering a sense of unity among students, and acting as a bridge between students and faculty.
- Group Representative(3P1), TIET:** Served as **Group Representative for Batch 3P1**, acting as a liaison between students and instructors, coordinating schedules, and resolving academic concerns efficiently.

DSA & CODING PROFILES

- Solved **450+ Data Structures & Algorithms** problems across [Leetcode](#), [Code360](#), and [GeeksforGeeks](#).
- Strong in **Arrays, Trees, Graphs, Dynamic Programming, Recursion, and Greedy**
- Consistent problem-solving practice with **badges & active streaks** across all Platforms.
- Implemented solutions using **Java** with focus on clean logic and edge-case handling.
