EDUCATION

- **Thapar Institute of Engineering & Technology, Patiala**
Bachelor of Engineering – Computer Science & Engineering; CGPA: 7.53 August 2023 - May 2027
Courses: Introduction to Computer Programming, Operating Systems, Computer Architecture, Data Structures and Algorithms, Object Oriented Programming, Computer Networks, Machine Learning, Software Engineering, Data Engineering, Database Management Systems.
- **Central Board of Secondary Education**
Senior Secondary - 12th; Percentage: 88.6% April 2021 - March 2023
- **Central Board of Secondary Education**
Secondary - 10th; Percentage: 91.4% April 2020 – March 2021

PROJECTS

- **Cloud Share:** [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)
Tech Stack: Spring Boot, PostgreSQL, Spring Data JPA, Redis, Cloudinary, React.js
 - Description: Developed a full-stack cloud storage platform for secure file upload, organization, search, and sharing.
 - Role: Designed and implemented scalable backend services, including JWT-based authentication, file and folder management, cloud storage integration, search functionality, Redis caching, and RESTful APIs with Swagger documentation
 - Technologies Used: Spring Boot, Spring Security, JWT, PostgreSQL, Redis, React.js, Cloudinary, JPA/Hibernate, Swagger, Git/GitHub
 - Outcome: Delivered secure file sharing, folder hierarchy, fast search, Redis caching, and cloud-based storage with a responsive React frontend.
- **BookMyEvent:** [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)
Tech Stack: Spring Boot, PostgreSQL, Spring Data JPA, React.js, Redis
 - Description: Developed full-stack event management, ticket booking platform that allows organizers create and manage, Users to book tickets.
 - Role: Designed and developed the complete backend architecture including JWT authentication, role-based access control, booking workflows, payment verification system, email integration, and REST APIs. Also contributed to frontend integration.
 - Technologies Used: Spring Boot, Spring Security, JWT Authentication, PostgreSQL, React.js, Redis, Spring Data JPA (JPQL), Git/GitHub.
 - Outcome: Implemented secure authentication and protected REST APIs, built an end-to-end event booking lifecycle with payment and ticket verification, integrated PostgreSQL, and applied Redis caching, DTO-based API design, and scalable backend architecture.
- **Cab On Campus:** [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)
Tech Stack: Spring Boot, PostgreSQL, Spring Data JPA, React.js, Redis
 - Description: Developed a full stack campus cab booking platform for students and drivers within Thapar University, managed by admins.
 - Role: Designed and developed the backend APIs, authentication, database integration, exception handling, contributed to the React frontend.
 - Technologies Used: Spring Boot, Spring Security, JWT Authentication, PostgreSQL, React.js, Redis, Spring Data JPA (JPQL), Git/GitHub.
 - Outcome: Implemented secure JWT based authentication and role-based authorization, DTO driven API design, centralized exception handling, and frontend backend integration. Achieved an average **API response latency of ~120 MS** on localhost during testing.
- **Skills Swap:** [\[GitHub\]](#) | [\[Live\]](#) | [\[Swagger\]](#)
Tech Stack: Spring Boot, WebSocket API, MongoDB, React.js,
 - Description: Developed a full-stack platform that enables users to exchange skills through barter-based learning and collaboration.
 - Role: Designed and implemented scalable backend services, including authentication and authorization, profile management, barter post and request workflows, skill discovery, admin dashboard features, real-time messaging with WebSocket, API documentation using Swagger.
 - Technologies Used: Spring Boot, Spring Security, JWT Authentication, MongoDB, React.js, WebSocket API, REST APIs, Swagger, Git/GitHub
 - Outcome: Implemented secure authentication, profile verification, skill-based search, barter request management, admin controls, and real-time one-to-one messaging.

SKILLS SUMMARY

- **Programming Languages:** Java, SQL, C++, JavaScript
- **Backend Technologies:** Spring Framework (Spring Boot, Spring Data JPA, Spring Security, JWT), Hibernate, WebSocket API
- **Frontend Technologies:** HTML5, CSS3, JavaScript, React.js, Bootstrap
- **Databases:** PostgreSQL, Redis, MySQL, MongoDB
- **Tools:** VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Maven, Postman

DSA & CODING PROFILE

- **Leetcode:** [\[PROFILE\]](#) | 250+ problems solved
- **Geeks for Geeks:** [\[PROFILE\]](#) | 250+ problems solved | 900+ Coding Score
- **Coding Ninjas:** [\[PROFILE\]](#) | 200+ problems solved

CERTIFICATIONS

- **Java (Basics), Hacker Rank:** [\[VIEW\]](#)
- **SQL(Basics), Hacker Rank:** [\[VIEW\]](#)
- **JDBC Servlets and JSP - Java Web Development Fundamentals, Udemy:** [\[VIEW\]](#)
- **Spring Boot & Spring Framework, Udemy:** [\[VIEW\]](#)

TECHNICAL HIGHLIGHTS

- Active **GitHub** profile with 40+ public repositories.[\[VIEW\]](#)
- 900+ **GeeksforGeeks** Coding Score.
- Ranked in the top 3% among 14,500+ **GeeksforGeeks** users at Thapar University.
