

EDUCATION

Year	Degree/Certificate	Institute	CGPA/Percentage
2023 – 2027	B.E. Computer Science	Thapar Institute of Engineering & Technology, Patiala	7.53 CGPA
2022 – 2023	CBSE (XII)	SAJSMS, Ambala	88.6%
2020 – 2021	CBSE (X)	SAJSMS, Ambala	91.4%

PROJECTS

- Cloud Share**

Spring Boot, Spring Cloud Gateway, PostgreSQL, Redis, Cloudinary, React.js

GitHub | Live | Swagger

 - Built backend for a full-stack, microservices-based cloud storage platform; designed authentication and file management services, configured API routing via Spring Cloud Gateway, and secured APIs with JWT.
 - Integrated Redis caching and Cloudinary storage, documented REST APIs with Swagger, and improved modularity by decomposing a monolith into independent services while preserving folder hierarchy and fast search.
- BookMyEvent**

Spring Boot, PostgreSQL, Spring Data JPA, React.js, Redis

GitHub | Live | Swagger

 - Built backend for a full-stack event management and ticket booking platform; implemented JWT authentication, role-based access control, and end-to-end booking workflows.
 - Implemented payment verification, email integration, and Redis caching with a DTO-based API design.
- Relay – Event-Driven Notification Platform**

Spring Boot, Apache Kafka, PostgreSQL, Redis, React.js, Docker

GitHub | Live | Swagger

 - Built backend for an event-driven messaging and notification platform using Spring Boot, Apache Kafka, and React.js; implemented multi-tenant organization channels, member management, and stateless JWT authentication with RBAC.
 - Architected asynchronous Kafka consumer groups for reliable email and OTP dispatch via Brevo API, integrated Redis TTL caching for verification flows, and containerized multi-service infrastructure with Docker.
- NotThatShort – URL Shortener**

Spring Boot, MongoDB, Redis, React.js, Spring Security, JWT

GitHub | Live

 - Built backend for a full-stack URL shortener platform with MongoDB and React.js; implemented secure JWT authentication, BCrypt encryption, and email OTP verification with Redis TTL caching for registration and password resets.
 - Implemented low-latency URL redirection and link retrieval using Spring Cache with Redis, enforced user quota limits, and configured automated 7-day link expiration with cache eviction.

TECHNICAL SKILLS

- Programming Languages:** Java, SQL, C++, JavaScript
- Backend Technologies:** Spring Boot, Apache Kafka, Spring JPA, Spring Security, Hibernate, Microservices, Spring Cloud
- Frontend Technologies:** HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS
- Databases:** PostgreSQL, Redis, MySQL, MongoDB
- Tools:** Docker, VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Maven, Postman

KEY COURSES TAKEN

- Relevant Coursework:** Introduction to Computer Programming, Operating Systems, Computer Architecture, Data Structures and Algorithms, Object Oriented Programming, Computer Networks, Machine Learning, Software Engineering, Data Engineering, Database Management Systems

CERTIFICATIONS

- Java (Basics)** – HackerRank
- SQL (Basics)** – HackerRank
- JDBC, Servlets and JSP – Java Web Development Fundamentals** – Udemy
- Spring Boot & Spring Framework** – Udemy

DSA & CODING PROFILE

- LeetCode** – 350+ problems solved
- GeeksforGeeks** – 300+ problems solved, 1000+ Coding Score
- Coding Ninjas** – 200+ problems solved

TECHNICAL HIGHLIGHTS

- GitHub:** Active profile with 40+ public repositories.
- Programming Statistics:** 1000+ GeeksforGeeks Coding Score and 1600+ maximum LeetCode contest rating.
- Ranked among the top 3% of 14,500+ GeeksforGeeks users at Thapar University.
- Group Representative:** Served as Group Representative for 3P1 for 1 year, coordinating communication, academic activities.
- Tech Lead & Backend Developer:** Led backend development and technical implementation for the Capstone Project.
